Association of Psychology Postdoctoral and Internships Center Member

JEFFERSON CENTER
Building Hope   Changing Lives   Strengthening Community
Accreditation Disclosure Statement

Jefferson Center is accredited by the Office of Program Consultation and Accreditation American Psychological Association and participates in the APPIC Internship Matching Program. Applicants must complete the APPIC on-line APPI. This internship site agrees to abide by the APPIC policy that no person at this training facility will solicit, accept, or use any ranking-related information from any intern applicant.

Questions related to Jefferson Center Internship program accreditation status should be directed to the Commission on Accreditation:

Office of Program Consultation and Accreditation American Psychological Association
750 1st Street, NE, Washington, DC 20002
Phone: (202) 336-5979
Email: apaaccred@apa.org

Non-Discrimination Statement
Jefferson Center is committed to a policy of providing educational opportunities to all qualified students regardless of economic or social status, and will not discriminate on the basis of race, color, religion, sex, marital status, beliefs, age, national origin, sexual orientation, physical or mental disability or any other legally protected category. Jefferson Center is a Drug-Free and Tobacco Free Workplace.
**Jefferson Center’s Mission**

To inspire hope, improve lives and strengthen our community by providing mental health and related solutions for individuals and families.

**Jefferson Center’s Vision**

A community where mental health matters and care is accessible to all.

**Overview of Jefferson Center**

Jefferson Center (Jefferson Center) is a private 501(c) (3) not-for-profit community mental health center serving Jefferson, Clear Creek and Gilpin counties for more than 50 years. Jefferson Center’s programs and services are designed to foster recovery and resilience for individuals of all ages who have mental health problems. As a private non-profit, Jefferson Center served more than 34,000 people in 2020. Our services are provided through numerous clinical locations in our three-county service area, in addition to schools, nursing homes, senior centers, and other partner locations throughout our community.

Jefferson Center recognizes that physical and mental health are linked. Research indicates that better integration of behavioral health and physical health care can have a positive impact on quality, costs and outcomes while also reducing health disparities. Since 1995, Jefferson Center has provided integrated health care to benefit clients through our successful partnerships with health care entities and organizations such as substance abuse providers, school-based health clinics, and community primary care practices. Our wellness now! prevention program offers individualized coaching and classes.

Jefferson Center’s clinical programs are grounded in the values of resiliency and recovery, and the entire organization strives toward being trauma-informed in view of the high prevalence of trauma among the populations we serve. Jefferson Center services are person-centered and promote hope through care that supports achievable positive outcomes.

**Diversity, Equity, and Inclusion Statement**

At Jefferson Center, it is our policy and our mission to be inclusive and mindful of the diversity of everyone who comes through our doors. We are passionate about building a community where mental health matters and equitable care is accessible to all races, ethnicities, abilities, socioeconomic statuses, ages, sexual orientations, gender expressions, religions, cultures, and languages.

Outlined below are the principles which guide our commitment to developing a vibrant, sustainable, and resilient mental health care community.

We believe in the dignity of all people and creating a culture where diversity is valued.

We respect and affirm the unique identity of each member of our community.

We aim to inspire hope, improve lives, and strengthen our community by providing
quality mental health and related solutions to everyone who comes through our doors.

We advocate at the local, state, and federal levels to promote equitable access to mental health care resources and improve the lives of community members.

We strive to dismantle systems and policies that create inequity, oppression, and disparity while promoting diversity, equity, and inclusion in all that we do.

We pursue an organizational mindset that values cultural humility, recognition, and accountability in order to improve our ability to offer individualized care.

We encourage all to share their cultural experiences and identities to enrich our community.

We are committed to placing diversity, equity, and inclusion practices at the center of our daily work to create a brighter future for everyone.

Clientele Served
Jefferson Center serves clients that are predominantly low-income, with health coverage through Medicaid, or who are uninsured or underinsured. Jefferson Center targets those most in need. In CY 2018, 68% of clients served had Medicaid and 50% had serious mental illness. 27.8% of clients in 2018 were under the age of 18. However, Jefferson Center serves individuals of all income strata, with the full range of difficulties from mild or moderate to severe.

At Jefferson Center, it is our policy and our mission to be inclusive and mindful of the diversity of everyone who comes through our doors. For all clients, regardless of the program in which they are enrolled, Jefferson Center provides an array of services based upon individual needs: individual, group and family therapy, case management, medication evaluation and management, and emergency services, as needed. Through our Speaker’s Bureau, the evidence-based Mental Health First Aid classes, wellness classes and other community outreach presentations, we raise awareness and dispel myths about mental illness, provide tips and tools for mental wellness, and help inform the community about ways to access help, including the wide variety of services that the Center offers (e.g. wellness classes, specialized programs for children/youth, outreach to older adults, etc.).

Training Philosophy
The Jefferson Center Doctoral Psychology Internship Program seeks to train interns to become clinical psychologists with a firm foundation in health services psychology. Our philosophy is three-fold: (1) that training in health services psychology is a continual developmental process, (2) that providing a broad range of training opportunities is optimum for the growth of developing clinical skills, and (3) that clinical health services psychology is a science-based discipline and it is important to apply research to inform practice.

First, our philosophy emphasizes the continual professional development of our interns. Jefferson Center seeks to build on the skills developed during the doctoral education and practicum placements through systematic assessment and training. As interns
progress through the internship rotations, they are given more and more complex cases in therapy and assessment. By the end of the internship year, interns should graduate as competent entry-level clinical psychologists who can function in a variety of settings and continue to develop professionally throughout their careers. Thus, our developmental approach ensures that training for practice in clinical psychology is sequential, cumulative, and graded in complexity.

Second, our philosophy provides a broad range of training opportunities for optimum development of clinical skills. Jefferson Center offers a broad range of training sites that cover the entire developmental spectrum. Through two major and four minor rotations, interns practice in a variety of settings that gives them a diverse set of clinical experiences and prepares them for work in a variety of professional positions.

Finally, our philosophy is that health services psychology must be a science-based discipline. We seek to further develop the appreciation of science as the foundation for the practice of clinical psychology throughout our training program. Research informs the practice of psychology at Jefferson Center from our use of the evidence-based Partnership in Change Outcome Management System, to our use of evidence based treatment practices (EBPs) throughout our programming, and ongoing outcome research in our Innovation department. Our internship program exposes interns to ongoing use of research to inform treatment across all rotations and gives them experience in participating in research focused on the delivery of effective services.

**Training Program Description**

Our internship program provides comprehensive training that is broad and general, developmental, and anchored in the practitioner-scientist model. Our training focuses on profession-wide competency areas derived through a multi-step process that is expected for entry-level practice. Ongoing evaluation of intern functioning in specific competency areas allows us to track progress and address areas that may require further training. Interns are evaluated on their demonstration of appropriate knowledge, skills, and attitudes in the key competency areas.

Intern training is enhanced by early identification of individual training needs and interests. During the first month of training, all interns complete a self-assessment that provides information to develop an individualized training plan to address not only individual differences in prior training, but also clinical interests and career goals. Various training approaches are utilized across settings, including direct supervision by experienced clinical supervisor psychologists, direct observation (either live or video/electronic) of the intern, participation in co-therapy, utilization of role-play and enactment, observational learning, formal didactic training, and promotion of reflective practice through self-reflection and self-evaluation to facilitate continuous improvement of professional performance.

By incorporating a mentoring model coupled with experiential training under close supervision, our program is designed to nurture interns toward success. Training is sequential, cumulative, and increasing in complexity over the course of the internship.
Interns are expected to move toward professional independence as they progress through the training year. This ensures that interns will be able to demonstrate the levels of competency that are necessary for entry-level practice or post-doctoral training at the end of their training.

The program’s training model promotes appreciation and understanding of diversity by ensuring nondiscrimination in all training approaches, by addressing diversity as a focus of training, and by creating an environment that nurtures success for all interns.

In addition to experiential training, didactic seminars focus on providing current research-based education on the above goals. Interns participate in seminars related to professional development, ethics, culture and practice, theory of assessment, treatment of psychological disorders, and the relationship between psychological and physical health.

**Training Goals**
The Doctoral Psychology Internship Program at Jefferson Center is committed to training that emphasizes both the professional and personal development of interns in a community mental health setting. After the completion of the internship year, interns will have the skills necessary to enter the field of psychology based on the following goals:

**Goal 1:**
Interns will achieve competence appropriate to their professional developmental level in the area of evidence-based practice in intervention.

**Goal 2:**
Interns will achieve competence appropriate to their professional developmental level in the area of evidence-based practice in assessment.

**Goal 3:**
Interns will achieve competence appropriate to their professional developmental level in the area of ethical and legal standards.

**Goal 4:**
Interns will achieve competence appropriate to their professional developmental level in the area of individual and cultural diversity.

**Goal 5:**
Interns will achieve competence appropriate to their professional developmental level in the area of research.

**Goal 6:**
Interns will achieve competence appropriate to their professional developmental level in the area of professional values and attitudes.
Goal 7:
Interns will achieve competence appropriate to their professional developmental level in the area of communications and interpersonal skills

Goal 8:
Interns will achieve competence appropriate to their professional developmental level in the area of consultation/inter-professional/interdisciplinary.

Goal 9:
Interns will achieve competence appropriate to their professional developmental level in the area of Supervision.

Each of these goals will be achieved through focus on specific objectives and the development of specific related competencies.

Training Schedule
The internship training year starts in late August and concludes the end of August the following year (52 weeks, excluding Personal Annual Leave and holidays). Interns are expected to work 45 – 50 hours per week (approximately 25 - 50% of time is spent in face-to-face contact depending on the intern’s rotation). Interns must reach competency across goals and complete 2000 hours for successful completion of the internship program. The schedule below provides an approximation of the number of hours interns will spend each week in the following activities:

- **Major Clinical Rotations**
  Each intern will participate in one 16 – 24 hour/week Major Clinical Rotation each six-month period. Time for team meetings, group supervision, documentation and other paperwork is built into the rotation. The Internship Program will attempt to match the interns with their major rotation of choice during each six-month rotation. In the event of competing interests, the desired rotations can be alternated at the end of the first six-month period, allowing interns to be matched with their area/s of interest.

  There may be consideration of individualized programs that include specialty training in an intern’s area of interest while on a rotation. For example,
  - On Adult Outpatient rotation doing 1 day with the Senior Services team
  - On Family Outpatient rotation doing 1 day with the Early Childhood Family Services team

  For interns wishing to do a year-long training experience with a specific age group, major rotations can be designed to allow for two 6 month training rotations with either children/youth or adults. For example,
    - 12 month training experience with children/youth/family picking two major rotations from below:
      - 6 months with the Family Services Outpatient clinic
      - 6 months with the Early Childhood Family Services team
      (serving 0 – 8 years of age)
- 6 months Centro Dones (for interns with bilingual/bicultural major competency)

- 12 month adult training experience picking two major rotations from below:
  - 6 months with Adult Outpatient Services
  - 6 months with Senior Services Outpatient
  - 6 months Centro Dones (for interns with bilingual/bicultural competency)

**Specialty Minor – Innovation Team (4 - 6 hours)**

Under the direction of the Chief Innovation Officer (CINO) Dr. Brandon Ward, the Innovation team is chartered with exploring ways to use technology to innovate service delivery, increase community engagement, and support staff growth and productivity. Interns who are interested can do a specialty minor of 6 months working on different projects as they evolve. Current projects include implementing remote client monitoring, implementing telehealth strategies across diverse teams, and evaluation of telehealth services.

**Supervision - 4 - 6 hours**
- 2 hours Individual with primary
- 2 hours Psychological assessment
- 1 hour Crisis rotation
- 1 hour Supervision of supervision
- 1 hour Research
• **Didactic Training and Seminars** – 2 hours

• **Committee Involvement - optional**
  Interns are also encouraged to participate on one of several Jefferson Center committees, as an added value to their experience, time and interest permitting.

Jefferson Center uses multidisciplinary teams across all settings. Interns will have the opportunity to interact daily with staff from virtually all mental health disciplines including social work, psychiatry, nursing, licenses counselors, and peer specialists.

*Each intern will be expected to complete 6 Psychological Evaluations (6 hours to administer full battery, 4 hours to score & synthesize, 2 hours to review with supervisor, 4 hours to final write up; 1 hour to give feedback to client, 2 hours to chart documentation, 1 hour to communicate with referral source = 20 hours total)*
Supervision
Each intern will be assigned a licensed psychologist as their primary clinical supervisor who will provide two hours per week of face-to-face, formal, individual supervision. After six months, interns will rotate supervisors in order to broaden their experience of supervisory styles. Supervision will focus on review of the intern’s caseload, discussion of specific cases, professional development, assessments, and evaluation of training progress. Interns will also receive supervision from on-site supervisors, specific to their major and minor rotations.

Training Seminars
Interns will attend at least two hours per week of didactic training. There are topic specific seminars covering a variety of evidence based approaches, psychological assessment, and professional development as well as didactics by professionals from different disciplines. (Please see sample schedules in Appendix)

Each intern is required to complete three presentations during the training year: 1) the intern’s dissertation/research based doctoral paper, 2) formal case presentation, and 3) the intern’s outcome study from research rotation. Agency staff is invited to attend these presentations.

Psychological Assessment
The program recognizes that the ability to competently perform psychological evaluations is one of the distinctive features of practicing psychologists. Interns are expected to have acquired knowledge and technical skills in graduate school sufficient to accurately administer and score a full psychological battery of tests. The emphasis in the internship program is to further develop the intern’s ability to integrate data and to write succinct, high quality reports.

Each intern will be required to complete six integrated psychological evaluations during the year. Assessment referrals may come from Adult or Family Services teams. Evaluations will generally include a clinical interview; administering, scoring and interpreting a full battery of intellectual and personality assessments, including projective and objective measures; writing a report and providing feedback to the person being tested (for children, including parent/guardian) and referral sources.

Successful Completion of Internship
In order for interns to successfully complete the program they must:
- obtain ratings of at least a "3" (Entry Level Professional Mastery) on all items for each goal/competency area on their end-of-year Intern Performance Evaluation;
- complete 6 integrated psychological assessments;
- present a case study utilizing evidence-based interventions or psychological assessments before the Doctoral Psychology Internship Training Committee;
- not be found to have engaged in any significant ethical transgressions.
Due Process for Intern Training Problems
The training program at Jefferson Center is committed to maintaining a positive working environment. Effective communication between an intern, supervisor and/or Training Director is essential to fostering a respectful and courteous environment. It is the right and responsibility of the intern to report problems with training and/or supervision. The Doctoral psychology internship is a program of Jefferson Center and as such, psychology interns are expected to abide by all agency policies, regulations and guidelines governing organizational practices and individual conduct. Interns are also expected to abide by the ethical standards and principles set forth by the American Psychological Association and Association of Psychology Postdoctoral and Internship Centers (APPIC). Alleged intern misconduct or violation of organizational practices will come under the jurisdiction of the training program. Interns are subject to remediation and are protected by due process (please refer to Section 2: Policies and Procedures, Doctoral Psychology Intern Manual).

Administration of the Internship
The Internship Training Director directs and organizes the organizational and administrative aspects of the training program and its resources, ensures the integrity and quality of the program, including the provision of quality care to clients. The Training Director with the assistance of the Administrative Assistant, maintains the internships’ documents, maintains interns' training records; monitors and evaluates the training program’s goals and activities and seeks to ensure that the training program consistently meets APPIC requirements. The Training Director is responsible for the minutes of the quarterly meetings and facilitating program changes that are identified during mid-year and end of year evaluations.

The Doctoral Psychology Internship Training Committee is comprised of the Training Director, primary supervisors, and adjunct supervisors. The Training Committee meets bimonthly for ongoing planning, quality improvement, and training needs of the interns. The Training Committee also meets extensively in November, December, and January to screen new applicants, participate in interviews, ranking and the selection of the new internship class. As committee members they are responsible for provision of primary supervision by a licensed psychologist (including clinical responsibility for all of the interns’ clinical work and cases), and for the operation of the training program, including the didactic training seminars.

Stipend & Benefit
Jefferson Center currently has two Doctoral internship positions budgeted. The current stipend for the internship is $30,000. In addition, the Center’s benefit package is available. Psychology interns receive a full benefit package, including the Center’s contributions toward health and dental insurance, a medical and dependent care flexible spending plan, life insurance, professional liability insurance, short and long-term disability insurance, an EAP program, 16 days of Personal Annual Leave (PAL) for vacation, personal, or sick leave, 4 “working” holidays (holidays when the Center is open and the individual may take that day or a subsequent day off in order to respect diversity of cultural/religious practice), and 8.5 holidays when the Center is closed.
**Bilingual Salary Differential**
For interns who are bilingual and bicultural and doing a rotation with Centro Dones, there is a bilingual salary differential of 10%. The incentive is part of a broader framework by which Jefferson Center seeks to attract and retain employees who possess skills critical to serving diverse consumer communities with responsive, respectful and effective care focused on eliminating disparities related to access, retention, and outcomes for marginalized and/or non-English speaking communities.
Internship Program Admissions
Date Program Tables are updated: 5/22/2021

Jefferson Center and its Doctoral Psychology Internship Program are committed to the recruitment of culturally and ethnically diverse interns. We encourage inquiries and applications from all qualified individuals.

Completed applications are to be received no later than November 19, 2021 and are expected to meet the following requirements:

- Doctoral student in an APA-accredited Clinical or Counseling Psychology program or in a re-specialization training program in Clinical or Counseling Psychology within an APA-accredited program
- Approval for internship status by graduate program Training Director
- Academic coursework completed by the end of the academic year preceding the start of internship
- Cumulative GPA of 3.4 or greater
- Completion of 4 integrated psychological reports (25 direct contact hours), including projective, objective and cognitive assessments:
  - minimum of 1 child/adolescent administered
  - minimum of 1 adult battery administered
  - minimum of 1 WISC or WAIS administered
- Preferred applicants with have a minimum of 2 Rorschachs administered, preferably to both an adult and child/adolescent (Exner or RPAS)
- Completion of at least 300 practicum intervention hours by the start of the internship including:
  - adults/older adults
  - children/adolescents
  - evidence based practices
- Approval of dissertation proposal by application deadline
- Dissertation defended by the start of the internship
- A de-identified psychological assessment report is required with the application

Applications are reviewed by members of the Training Committee. Our selection criteria are based on a "goodness–of–fit" with our practitioner-scientist model, and we look for Interns whose training goals match the training that we offer. The program looks not only at the total number of practicum hours but the quality of those hours in terms of the type of setting as well as experience with empirically supported treatments. If you have no Rorschach experience or limited Rorschach experience your application will still be considered as we look at your total assessment experience. All students who submitted a completed application will be notified of their interview status by December 8, 2021.
Based on the quality of the application and the goodness of fit between the applicant’s training goals and the internship program, approximately twenty-five applicants are invited for an interview. Interviews are conducted in January and all interviews will be conducted remotely via zoom. Interviews are conducted with individual applicants by a panel of no less than three psychology supervisors in a group format. Standardized questions are asked and scored for all candidates interviewed.

Following the completion of the interviews, the Training Committee meets to rank order applicants, which is based on both the submitted application and the interview. The final ranking order is determined by consensus of the Training Committee. This internship site agrees to abide by the APPIC policy that no person at this training facility will solicit, accept, or use any ranking-related information from any intern applicant. Following the results of the APPIC Match, a letter confirming the match with Jefferson Center’s Doctoral Psychology Internship will be sent to the incoming intern with a copy to the DCT of their program.

Results of the APPIC Match constitute a binding agreement between the matched applicants and the program. However, as stated in our listing in the APPIC directory, final appointment of applicants to the internship at Jefferson Center is contingent on applicants passing a criminal background check. A pre-employment background check is completed on all matched applicants. Felony assault convictions will be considered a failed background check. Federal misdemeanors and misdemeanors are handled on a case-by-case basis.

If not a US Citizen, you will be required to provide documentation to verify eligibility following match and before employment.

Jefferson Center for Mental Health is committed to a safe, healthy, and productive work environment for all employees free from the effects of substance abuse. Abuse of alcohol, drugs, and controlled substances impairs employee judgment, resulting in increased safety risks, injuries, and faulty decision-making. Jefferson Center for Mental Health follows Federal Law regarding cannabis and other drugs. We do not do a pre-employment drug test but all employees may be asked to submit a random urine drug screen should there be indications that substances may be affecting job performance.

Training Site and Rotation Descriptions
The Doctoral Psychology Internship offers five major rotations, including a choice of specialty programs within the Family Services and Adult Outpatient rotations. There are three minor rotations.

Major Clinical Rotations

1. **Adult Outpatient – Independence Office**
   **Population:** Adult Outpatient Services (AOP) is the largest clinical network at Jefferson Center. It provides individual and group therapy to adults 18 – 60 years old who have been diagnosed with a Serious Mental Illness or Severe and Persistent Mental Illness, and who meet a level of acuity appropriate for a relatively brief episode of treatment (approximately 35 sessions annually). The majority of consumers have co-morbid illnesses, including addictions, personality disorders, developmental disorders and medical illnesses, and treatment is integrated and comprehensive. In FY 18, 10,064 clients were served, 88.3% adults and 11.7% children or adolescents. The race/ethnic breakdown of clients was: American Indian = 1.7%, Asian/Pacific Islander = 1.1%, Black/African-American = 2.3%, More than One Race = 3.8%, Other = 1.8% Unknown/Declined = 6.1%, White = 83.2%. Hispanic/Latino Ethnicity = 17.1%

   The highest represented diagnoses were depression and PTSD. The five most common diagnosis breakdowns were as follows: Alcohol use Disorder = 8%, Bipolar II Disorder = 5%, Generalized Anxiety Disorder = 15%, Major Depressive Disorder = 17%, PTSD (post-traumatic stress disorder) = 22%.

   **Training experiences:** Interns are responsible for doing same-day intakes to assess needs. Depending on interns’ training needs, they may either follow the case or transfer it to another clinician. Interns provide evidence-based treatments for a variety of behavioral health disorders and have the opportunity to participate in a dialectical behavior therapy skills group. Interns participate in team meetings and group supervision.

2. **Senior Services Outpatient – North Wadsworth Office**
   **Population:** The Senior Services Program provides clinical services for older adults aged 60 years and older in a variety of settings, including home-based, traditional outpatient, and co-locations throughout the community. This program provides treatment to individuals with a broad range of clinical presentations including adjustment disorders, depression, anxiety, grief/loss, phase of life issues, loss or change of independence and identity, chronic health conditions, as well as older adults with Serious Mental Illness or Severe and Persistent Mental Illness. Through evidenced-based interventions, the mission of the Senior Services Program is to help older adults regain confidence, increase their ability to cope with everyday changes and assist with maintaining health and independence.

   In FY 18, 516 clients were served. The race/ethnic breakdown of clients was: American Indian = .8%, Asian/Pacific Islander = 0.4%, Black/African-American =
4.6%, More than One Race = 1%, Other = 1.6% Unknown/Declined = 13%, White = 81.8%. Hispanic/Latino Ethnicity = 7.6%.

The highest represented diagnoses were depression and Generalized Anxiety Disorder. The five most common diagnosis breakdowns were as follows: Generalized Anxiety Disorder = 10%, Major Depressive Disorder = 8%, Major Depressive Disorder, recurrent, mild = 6%, Major Depressive Disorder, recurrent, moderate = 16%, PTSD (post-traumatic stress disorder) = 8%.

**Training experiences:** Interns will have the opportunity to provide direct clinical services to older adults such as individual, family, and group therapy. Interns will also be responsible for completing intake assessments for individuals who may either become a client or be transferred to another clinician/team, as appropriate. Other training experiences will include case management, leading wellness classes, and collaboration with various community (medical/social) agencies through meetings and presentations. Interns will also participate in team meetings and group supervision.

3. **Family Services Outpatient – West Colfax office**

**Population:** Clients are children, adolescents and families. The number of clients enrolled in FY 18 was 3,073 clients. Of those served, 78% were adults and 22% children or adolescents. The race/ethnic breakdown of clients was: American Indian = 1.6%, Asian/Pacific Islander = 1.3%, Black/African-American = 3.1%, More than One Race = 5.5%, Other = 3.4% Unknown/Declined = 10.5%, White = 74.7%. Hispanic/Latino Ethnicity = 27.4%.

The most frequent diagnoses were PTSD, Generalized Anxiety Disorder and ADHD. The five most common diagnosis breakdowns were as follows: Attention-deficit hyperactivity disorder, combined type = 10.8%, Generalized Anxiety Disorder = 14%, Major Depressive Disorder = 10.1%, Major Depressive Disorder, recurrent, moderate = 7.5%, PTSD (post-traumatic stress disorder) = 18.3%.

**Training experiences:** Interns are responsible for doing same-day intakes to assess the needs of children, adolescents, and their families. Depending on interns' training needs, they may either follow the case or transfer it to another clinician. Interns provide evidence-based treatments for a variety of behavioral health disorders and can participate in a variety of groups. Interns participate in team meetings and group supervision.

4. **Early Childhood Family Services – Jeffco Family Health Services building**

**Population:** Children aged 0-8 and their families.

In FY 18, 609 clients were served, 83% adults and 17% children or adolescents. The race/ethnic breakdown of clients was: American Indian = 1.6%, Asian/Pacific Islander = 0.7%, Black/African-American = 3%, More than One Race = 5.6%, Other = 2.5% Unknown/Declined = 22.2%, White = 64.5%. Hispanic/Latino
Ethnicity = 27.1%.

The most frequent diagnoses were Adjustment Disorder, Anxiety Disorder and ADHD. The five most common diagnosis breakdowns were as follows: Adjustment disorder = 43.7%, ADHD (attention deficit hyperactivity disorder) = 10.4%, Anxiety Disorder = 14%, Impulse Control Disorder = 4.5%, Oppositional Defiant Disorder = 4%.

Training experiences: Interns are responsible for intakes to assess the needs of young children and their parents/caregivers. Interns provide evidence-based treatments (e.g., play therapy, Child Parent Psychotherapy) using a systemic approach for a variety of early childhood mental health disorders, and have the opportunity to participate in parenting education groups and early childhood consultation activities. Interns participate in team meetings and group supervision.

5. Centro Dones – Jefferson Plaza

Population: For this rotation you must be fluent in Spanish and English. On the Centro Dones rotation interns work with consumers of all ages from early childhood to older adulthood. In FY 18, 470 clients were served, 74% adults and 26% children or adolescents. The race/ethnic breakdown of clients was: American Indian = 1.9%, Asian/Pacific Islander = 0.9%, Black/African-American = 3%, More than One Race = 4.3%, Other = 13.4% Unknown/Declined = 11.3%, White = 65.3%. Hispanic/Latino Ethnicity = 41.7%

The most frequent diagnoses were PTSD, Alcohol use disorder and generalized anxiety disorder. The five most common diagnosis breakdowns were as follows: Posttraumatic Stress Disorder = 23.4%, Alcohol Use Disorder = 10.4%, Generalized Anxiety Disorder = 14%, Major Depressive Disorder = 11.9%, Cannabis Use Disorder = 8.5%.

Training experiences: Interns will provide individual, group, family, case management, and community outreach services to a population that tends to be underserved in multiple ways by multiple services agencies. Consequently, serving Centro Dones consumers entails the provision of mental health interventions, identification and treatment of the impacts of social determinants on health, promotion of well-being, and brokerage of other needed services. Interns will be offered culturally informed supervision with the aim of supporting the delivery of relevant, responsive and effective care.

Minor Rotations

1. Crisis Services – Crisis and Recovery Center

Population: children, adolescents and adults in Jefferson, Gilpin and Clear Creek counties. In FY 18 the population using Access/ Emergency services was 11.7% children or adolescents and 88.3% adults. The ethnic diversity was: American Indian = 1.7%, Asian/Pacific Islander = 1.1%, Black/African-American = 2.3%,
More Than One Race = 3.8%, Unknown/Declined = 6.1, White = 83.2%, and Other = 1.8%. Hispanic/Latino Ethnicity = 20.6%.

The most frequent diagnoses were PTSD and Depression. The five most common diagnosis breakdowns were as follows: Alcohol Use Disorder = 8%, Bipolar II Disorder = 5%, Major Depressive Disorder, recurrent, moderate = 17%, PTSD (post-traumatic stress disorder) = 22%.

**Training experiences:** Interns provide thorough evaluations on clients in crisis at the Jefferson Center’s Crisis and Recovery office and at the Juvenile Assessment Center. These evaluations are used to determine appropriate level of care. Evaluations should be comprehensive and provide ample justification of their determinations and recommendations, which may include admitting the client to a hospital or alternative facility. Interns function as professionals alongside staff at these various facilities. Many of these crisis evaluations involve use of Motivational Interviewing and a Solution-Focused approach to helping the client develop a safety plan, manage their crisis, and plan for follow-up services. Interns collaborate with clients, family members, and/or other interested individuals. Interns also conduct intakes on clients referred from local psychiatric hospitals.

2. **Research /Innovation – Independence office**

**Training experiences:** Jefferson Center’s internship program supports the continued development and refinement of interns’ research skills through promotion of their identity as practitioner-scientists and the integration of research skills with clinical experience. A minor rotation of 4 hours per week provides the intern with the opportunity to work with ongoing research efforts at the Center in a variety of areas including program outcomes, client feedback, and performance improvement.

3. **Psychological Assessment – Independence office – primary location**

**Population:** Referrals are for all age groups, children through adults for the purpose of differential diagnoses and for treatment recommendations in complex cases.

**Training experiences:** Interns participate in assessment seminars and complete a minimum of 6 integrated batteries over the course of the year.

| 8/27/2020  | 10 - 12:30 | Kirsten Kloock, PsyD       | DKEFs Training Part 1           | Presentation will cover how to administer and score the DKEFS as well as a discussion of what this tool measures. | 1. Understand psychometrics of DKEFS  
2. Overview of subtests and what they are meant to measure  
3. Observe and practice administering subtests  
4. Scoring the DKEFS |
| 8/30/2020  |            | computer based training    | Consent to treat and mandatory disclosure | Learn Colorado law regarding obtaining consent to treat and mandatory disclosure | 1. learn the legal requirements for mandatory disclosure and proper documentation |
| 8/31/2020  | 9:30a - 11:30 | Kirsten Kloock, PsyD       | WRAML training                  | This training provides overview of the WRAML, psychometric properties, administration, scoring and interpretation | 1. Understand psychometric properties of WRAML and how to administer  
2. Learn how to score and interpret  |
| 9/1/2020   | 1:00 - 4:30 | Joey Pachta, LPC           | Avatar Intakes                  | Understand the intake process at the Center using a remote platform. Learn about risk assessment and treatment planning. | 1. Know how to navigate the intake process.  
2. Review the importance of risk assessment and how to document. |
| 9/2/2020   |            | computer based training    | 27-65 law and mental health holds | this training covers mental health holds within the state of Colorado | Understand the requirements for mental health holds in Colorado |
| 9/2/2020   |            | computer based training    | HIPPA and Behavioral Health     | Overview of HIPPA background and regulations | Understand HIPPA and how it applies to mental health clients and practice at Jefferson Center |
| 9/2/2020   | 8a - 12p   | Kathy Baur, PhD            | Acceptance and Commitment therapy | Acceptance and Commitment therapy is a cognitive behavioral approach with the goal of creating psychological flexibility rather than symptom reduction. Looking at Relational Frame theory as the underpinning of ACT, learn how the processes relate to change and practice strategies in class. | 1. Understand the underlying theory of ACT.  
2. Define the 6 processes of ACT and how they relate to therapy.  
3. Demonstrate application of ACT processes in therapeutic setting. |
| 9/2/2020   | 1 - 3p     | Matthew Enright, PsyD      | Legal and Ethics in the practice of clinical psychology | In this seminar we will discuss Colorado mental health laws and review APA ethical guidelines. | Review, compare, and apply the following:  
1. APA Ethical Principles of Psychologists and Code of Conduct.  
2. Colorado Mental Health Practice Act (C.R.S. 12-43-101, et seq.).  
3. Colorado State Board of Psychologist Examiners Regulations (3CCR 721-1).

| 4/22/2021    | 12 - 2| Brandon Ward, PsyD       | Professional Development            | Meredith Smith, PsyD (Director) Family Services JCMH                                                                                                                                                    | 1. Interns will review components of specialization in family services  
2. Interns will identify their own training needs to better serve families  
3. Interns will develop skills on how to resource plan for families and best practices in family therapy treatment                                                                                       |
| 4/29/2021    | 12 - 2| ADHD webinar             | Cultural issues in diagnosing ADHD | Racism, structural bias, and individual discrimination are linked in research new and decades old to adverse health outcomes for racial and ethnic minorities. This is a fact of American medicine. And it plays out every day in the assessment and treatment of attention deficit hyperactivity disorder (ADHD or ADD) in African American children, who are both under-diagnosed with and inadequately treated for the condition. | Learn to skills to work towards more equitable health care, by recognizing issues that impact African American children without assuming that a universal African American experience exists |
| 5/6/2021     | 12 - 2| Kathy Baur, PhD          | Models and Theories of Clinical Consultation | Consultation is one of the core roles of a clinical psychologist. An understanding of the underlying theories and models of consultation is critical to providing appropriate and effective service to the consultee. The importance of taking a contextual approach in consultation to provide culturally appropriate services will also be discussed. | 1. Learn the basic theories and models of consultation as they relate to psychologists.  
2. Understand the application of consultation in a behavioral health setting.  
3. Discuss cultural and diversity issues as it applies to consultation – liaison services. Identify perceptions of consultation by requesting parties in order to provide appropriate and effective service. |
| 5/13/2021    | 12 - 2| Kelly E. Naylor, PhD     | Career Goals and leadership roles  | This seminar will focus on change/development of Intern’s next steps in their career goals and intentions for leadership roles, based on their growth and learning during the internship training year. | 1. Interns will review their personal definitions of leadership determined earlier in the training year and examine how/if those definitions have changed over time.  
2. Interns will review career goals and discuss how these have developed over time and due to training experiences.  
3. Interns will consider how telehealth practices and pandemic events have shaped their views of services provision and what is possible for research and clinical practices. |
<p>| 5/20/2021    | 12 – 2p| Interns                | Doctoral Interns Dissertation Presentations | Dissertation presentation to Psychologists, externs, and Senior management                                                                                                                                 | |</p>

The group will seek to improve the quality of care for our diverse clients as well as increase understanding and communication among staff members. Bring a case to discuss, or be available to provide insight and support to your colleagues. | 1. Identified and discuss cultural factors in clinical work  
2. Reflect on intersectionality of cultural factors for clinicians to enhance work with diverse population |
| 5/27/2021  |          | Brandon Ward PsyD  
Kelly Naylor PhD | Professional Development      | This meeting will review impact of COVID on clinical populations and providers.                                                                                                                               | 1. Interns will review APA research relevant to clinical practice in the time of COVID  
2. Interns will review recommendations moving forward in practice and indications of working with specific populations, particularly underserved groups in pandemic times |
| 6/3/2021   | 12 - 2pm | Kirsten Kloock, Psy.D.          | Setting up a private practice for success | This seminar will focus on creating, building, and maintaining a private practice.                                                                                                                         | 1. Discuss the pros and cons of private practice  
2. Understanding business models and revenue streams  
3. Discuss self-pay vs. insurance |
| 6/10/2021  | 12pm - 2:00 | Priya McLennan, Ph.D.         | Leading Without Authority     | This seminar explores the skills a leader can incorporate in order to help those around him/her cooperate and collaborate to reach their full potential. It will discuss how changing your mindset towards what Mr. Ferrazzi calls "co-elevation" (working to elevate those around you) can help everyone on the team. Drawing on emerging research in organizational and behavioral psychology, this seminar will discuss important components of leadership which include building trust, creating candor, and driving transparency and purpose. | 1. Interns will discuss and identify the difference between leadership that uses authority versus co-elevation.  
2. Interns will examine components of their own leadership style that they would like to improve upon in order to lead without authority. |
| 6/10/2021  | 11:30 – 1:30p | Webinar Legal panel        | Subpoenas and Testifying      | Legal experts will cover the basics of subpoenas and testifying in court.                                                                                                                                   | 1. Learn the different types of subpoenas  
2. Understand the difference between expert witness and testimony as a mental health professional |

| Interns    | Interns' Research presentation | Final project for the research rotation |
Response to COVID-19 by Jefferson Center Internship training program 2019.2020

Jefferson Center Psychology Doctoral Internship follows the guidelines adopted by APPIC as a part of CCTC.

Guiding principles:
- **Safety.** The safety of HSP service recipients, trainees, trainers, and our communities is of utmost importance.
- **Equity.** It is vital to make the HSP recruitment and selection process as accessible and fair as possible for diverse applicants and programs.
- **Ethics.** Reliance on an ethical framework for decision making to guard against bias and lapses during a stressful time when systems and the people in them are taxed.
- **Science.** Use of science, evidence-based findings, and the recommendations of public health experts to inform our process and recommended procedures.

Modifications in training program due to COVID-19 in the 2019.2020 Training Year

**Service Delivery Changes:**
By mid-March all therapy was being conducted via telephone or zoom and by April all clinicians were converted to zoom for individual therapy. Group therapy was converted to virtual sessions by May with DBT program starting up again for virtual sessions mid-June.

All supervision was completed remotely. All didactics were completed remotely with some in person trainings converted to webinar trainings to address immediate skills for telehealth.

**Rotation Changes:**

*Integrated Care rotation:* Due to the UCH/Infectious Disease/HIV clinic mid-March going fully remote, the integrated care rotation was modified. The intern assigned to that rotation was reassigned to a newly developed rotation on the Innovation team and was an integral part of the conversion of services to a video platform. The intern also participated in a virtual group for newly diagnosed patients with HIV with the other intern who had done the integrated care rotation in the fall.

*Adult Outpatient (AOP):* The intern assigned to the AOP rotation was assigned individual clients, but was unable to do intakes. The DBT group experience was delayed until June 17 rather than beginning in March.

*Psychological Assessment:* All cognitive assessments were cancelled until mid-June. The required battery of 6 assessments was lowered to 4 and the interns were able to complete social emotional test batteries remotely.
**Crisis rotation.** This is considered an essential service at the Center. Intern participation on this rotation was delayed until full safety procedure at the Crisis Center was in place.

**Changes to the Training Program for the 2020.2021 Training year due to COVID**

**Onboarding / Orientation:** A hybrid of both in person and remote orientation process was used. Opportunities to engage in team building activities with the internship class, supervisors, and assigned team was present throughout the fall/winter in a combination of in person or remote events.

**Supervision** – All supervision was done remotely until June 2021 with both in person and remote supervision offered.

**Didactics/Trainings:** Didactics occurred remotely with webinars augmenting regular trainings.

**Rotation Changes:**

**Integrated Care rotation:** The return to in person services at the Infectious Disease clinic at either full time or part time was delayed in the fall with restricted clinic days due to IDC protocol. Neuropsychological testing requirement was reduced and test administration was done onsite with the clinical interview and feedback sessions occurring remotely. Individual therapy cases remained remote. Interns participated in minor specialty rotation on the Innovative team to augment hours and carried cases from Jefferson Center’s Adult Outpatient team where services were delivered remotely.

**Adult Outpatient (AOP):** The intern assigned to the AOP rotation had the same training opportunities, however, services were delivered remotely. Mid-June services will be provided both remotely and in person.

**Psychological Assessment:** Following Center protocols and CDC guidelines, in person testing for cognitive testing referrals continued. Social emotional testing, clinical interviews, and feedback sessions occurred remotely. Interns were required to complete 6 psychological assessments over the training year.

**Crisis rotation.** This is considered an essential service at the Center. Based on interns’ preference, another training opportunity was provided in the fall and full return to Crisis training was available by January 2021.

**Anticipated changes to the Training Program for the 2021.2022 Training Year due COVID**

Should there be a continued public health emergency that may disrupt in person training, the internship will continue to provide services in a hybrid model. The impact on the training program will be as below and follow the same modifications that were present for the 2020.2021 Training year.
1. All individual clients will be seen through video platform; in person sessions will be done virtually following CDC guidelines.
2. All clinical groups will be done virtually.
3. All supervisions will be done virtually.
4. Didactics and other trainings will be done remotely and webinars added to augment training.
5. Psychological assessments will continue in person for cognitive and neuropsychological referrals following CDC guidelines for in person testing. Social emotional testing, clinical interviews, and feedback sessions will be done remotely.
6. Crisis Services are considered essential services. If the Center is closed, interns can choose to replace this rotation with another clinical minor to be based on intern’s interest.
7. Given the immune comprised nature of the ICD population which resulted in disruption in intern training, the Integrated care rotation was removed from the available training sites and will not be offered.
