What is HCBS?

Home Community Based Services (HCBS) is available for people needing help to pay for services in their home or an assisted care facility. HCBS' philosophy is to keep people independent in their home. HCBS provides support at home such as medication management, light housekeeping, personal hygiene and grocery shopping. HCBS determines the appropriate service on a case-by-case basis.

What is LTC?

Long Term Care is a type of Medicaid available that pays for people to live in a nursing home or an assisted living center so that the people can receive services 24 hours a day as needed.

What is Home Care Services?

Home Care Assistance is a cash benefit that pays money to someone who provides home care services to those needing help with some or all of their daily self-care. The application process for this benefit is the same as for LTC and HCBS.

LTC and HCBS both come with Medicaid benefits. Home Care Services does not come with Medicaid.

Who is Eligible for These Services? Since HCBS, LTC and HCA is awarded based on medical and/or mental health disability, as well as an income criteria. People have to meet a medical and/or mental health standard of need at a nursing home or assisted living level of care. The county will determine if someone meets the medical and/or mental health criteria for HCBS services.
