Occupational and Physical Therapy Information

Occupational Therapy (OT): Occupational therapy treats injured, ill, or disabled patients through therapeutic use of everyday skills. OT helps patients develop, recover, improve, and maintain skills needed for daily living and working

Physical Therapy (PT): Physical therapy aims to help patients maintain, recover, or improve physical function and ability that may be impaired through injury, illness, or disability.

Colorado Medicaid Benefits: Individuals will need a referral from their PCP to access OT and PT services. There is not a hard-annual limit for receiving PT/OT services, but instead limited by number of authorized visits

Medicare Benefits: Medicare does not limit how much it pays for medically necessary outpatient therapy services in one calendar year. Contact your Medicare provider to see the specific costs of your outpatient services.
